Organizing online and onsite. Peacemaking.

Overview of Research

I seek to know everything and to apply that knowledge usefully.

[Wondrous Wisdom](#) is the language of conceptual structures which I develop with my colleagues at [Math 4 Wisdom](#), our investigative community for absolute truth.

[The Truth: From Relative to Absolute](#), 2014, is an illustrated guide to my program of documenting our personal perspectives, our relative truths, and then abstracting from them an unconditional perspective, the absolute truth.

A good sample of my approach is my talk at the XXIV World Congress of Philosophy in Beijing: [A Geometry of Moods: Evoked by Wujue Poems of the Tang Dynasty](#).

Theoretically, I investigate the limits of our imagination in four related domains:

- I overview and systematize the ways I imagine God, as in my talk, [Imagining God's State of Mind As a Question: Is God Necessary?](#)
- I model human experience, behavior, morality and dialogue by way of conceptual frameworks, as in my talk, [Consciousness as the Social Awareness Schema of a Disembodying Mind](#).
- I survey the ways of figuring things out in various disciplines, notably mathematics, as in [Discovery in Mathematics: A System of Deep Structure](#).
- I practice love, God, prayer and peacemaking towards a culture of independent thinkers, as in my talk, [The Orchard of Thoughts: An Alternative Culture of Growing in Not Knowing](#).

Practically, I express my ideas mathematically at my website Math4Wisdom.com, where I publish videos and seek Patreon supporters. I also seek fellowship with others for endless spiritual growth in a culture of investigation. Notably, I led a group of independent thinkers who are or were held at the Alytus Correctional Facility.

In 2020, [I led an email campaign](#) which convinced the Lithuanian government to forego a 64,000,00 EUR investment that would dishonor Vilnius's oldest Jewish cemetery.

As a historical researcher for Grant Gochin, a relative of Holocaust victims, I reached out to Silvia Foti, the granddaughter of a perpetrator, leading to the BBC program, [The Truth About My 'Hero' Grandfather](#), heard by 75 million listeners.

In 2009, I led the [Pyramid of Peace](#) to organize 100 peacemakers in Kenya and 100 online assistants to avert genocide.

Chris Messina singled out my paper, [An Economy for Giving Everything Away](#), as the [key influence](#) in his invention of the ubiquitous hashtag "#" in social media.

Education

1989-1993 Ph.D. Mathematics, University of California, San Diego.
